SUMMARY

Full-Stack Java Developer with experience building web applications using Java, Spring Boot, React, PostgreSQL, MongoDB, Redis, and Docker. Developed RESTful APIs, authentication systems, database-driven applications, and cloud deployments. Strong foundation in Data Structures Algorithms, object-oriented programming, and backend development with hands-on experience delivering full-stack projects.

PROJECTS

- Job Matrix** | *Spring Boot, React, PostgreSQL, Redis, JPA/Hibernate, JWT, Docker* [Code](#) | [Live](#)
- Developed a recruitment platform using Java, Spring Boot, React, PostgreSQL, Redis, JWT, and Spring Security, implementing 40+ REST APIs, RBAC for 4 user roles, authentication, OTP-based password recovery, recruiter onboarding, and company verification.
 - Built modules for job posting, application tracking, recruiter onboarding, search, filtering, pagination, resume management, recruiter invitations, request validation, and exception handling using Spring Data JPA and Hibernate.
 - Integrated JSearch API to fetch external job listings, implemented Redis caching, Cloudinary for media storage, Brevo SMTP for email notifications, and deployed the application on Render with Neon PostgreSQL.
- STEGO SEAL** | *Spring Boot, React, MongoDB, JWT, AES, Docker* [Code](#) | [Live](#)
- Created a steganography platform using Java, Spring Boot, React, MongoDB, AES encryption, and LSB encoding to securely hide and retrieve confidential messages from digital images.
 - Engineered 15+ REST APIs covering authentication, image embedding, message extraction, password recovery, role-based access control, user management, and validation using JWT.
 - Integrated Cloudinary for cloud image storage, containerized the application using Docker, reduced image processing latency by 30%, and improved deployment portability across environments.

EDUCATION

- | | |
|---|-------------------------------|
| Dr. A.P.J. Abdul Kalam Technical University
<i>ABES ENGINEERING COLLEGE B.Tech in Computer Science CGPA: 8.47</i> | Ghaziabad, India
2023-2027 |
| St. John's School, Marhauili
<i>ISC Class XII Aggregate: 87.8 %</i> | Varanasi, India
2022-2023 |
| St. John's School, Marhauili
<i>ICSE Class X Aggregate: 90.5 %</i> | Varanasi, India
2020-2021 |

TECHNICAL SKILLS

Languages: Java, JavaScript
Frontend: React.js, HTML5, CSS3
Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate
Databases: PostgreSQL, MongoDB, Redis
Tools: Git, GitHub, Docker, Maven, Postman, Swagger/OpenAPI, Cloudinary, Cursor, Vercel
CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering, System Design

EXPERIENCE

- Airports Authority of India** Jul 2026 – Present
Software Development Intern (AI) Delhi, India
- Developed an Agentic AI chatbot using Java, Spring Boot, Spring AI, Mistral, and Ollama, enabling intelligent question answering through Retrieval-Augmented Generation (RAG).
 - Designed a RAG pipeline incorporating PDF ingestion, document chunking, embedding generation, vector database indexing, and semantic retrieval, with automatic LLM fallback when no relevant document context is available.
- GeeksforGeeks ABESEC** 2024-2026
Event Lead
- Organized a 12-hour hackathon and multiple technical workshops, coordinating 250+ participants, managing logistics, securing approvals, and ensuring smooth event delivery.
 - Secured sponsorships, managed 30+ volunteers, and collaborated with industry partners to deliver large-scale technical events.
