Managing People :-

- Managing People working as Individuals and in groups
- To ensure that the engineers working on a project are as productive as possible
- People are the most important assets of the Organisation
- Managing People is the most essential part
- Goal achieve efficiently

Various activities involved in Managing People :-

1. Problem Solving :- Divide Problem into sub Problem or assign it to individual groups.
2. Motivating :- Motivating People continuously. Help to develop Positive attitude
3. Planning :- Plan each and every task (time + Resources)

Organizational Behaviour:

- Fredrick Taylor who study about the organizational behaviour
- Taylor analyze the most productive way of doing manual task.

Taylor has 3 basic Objectives :-

1. Select best People for Job.
 2. Train them in best method
 3. Provide incentives based on performance
- Taylor emphasized on the Importance of "Performance related pay"

Theories of the Organizational behaviour

Research showed how the state of mind of Person / workers influenced their Productivity

This attitude was divided into 2 type of theories. Theory X and Theory Y

Theory X :- Suggest that some managers believe People dislike work. (People tends to avoid responsibility).

- There is a need of control and direction

Theory Y:- Assume people enjoy work, can be self directed

- Take responsibility and possess creative qualities

Best method of Staff selection:
[AKTU-2021-22, 2022-23]

- Employee selection is the process of putting right men on right job.
- Effective selection can be done only when there is effective matching. By selecting best candidate for the required job, the organization will get quality performance of employee.
- By selecting right candidate for the required job, organization will also save time and money.
- Proper screening of candidate take place during selection procedure.

The employee selection process takes place in following order.

1. Preliminary Interviews:

- It is used to eliminate those candidate who do not meet the minimum eligibility criteria laid down by the organization.

2. Application blanks:

- The candidate who clear the preliminary interview are required to fill the application blank.

The Oldham's - Hackman Job Characteristics Model :- [AKTU-2021-22, 2022-23]

- The Oldham - Hackman job characteristics model focuses on creating meaningful and satisfying assignment for employees.
- When employees find their work meaningful & satisfying they are more likely to be happy and motivated in their jobs.
- Hackman and Oldham's job characteristics theory proposes that high motivation is related to experiencing three psychological states whilst working.

How Satisfying a Job is can be measured according to these five dimensions

- 1 Skill Variety:- This describe the range of skills and activities necessary to complete the job.
- 2 Task identity:- This dimension measures the degree to which a person can complete an activity or job in full. Workers who are able to take an activity from start to finish are usually more satisfied.
- 3 Task Significance:- Jobs are more satisfying if workers believe that they make a difference, and are adding real value to co-workers, the organization or the larger community. (Impact of Job on others)
- 4 Autonomy:- Freedom, make decision and Take actions
- 5 Feedback:- Provide information about result of an employee's work.

Critical Psychological States:

According to Hackman and Oldham, these core job dimensions lead, to a greater or lesser extent, to three different psychological states.

1. Experienced meaningfulness of the work.
This is the extent to which people believe that their job is meaningful, and that their work is valued and appreciated.

2. Experienced responsibility for the outcomes of work.
This is the extent to which people feel accountable for the results of their work and for the outcomes they have produced.

3. Knowledge of the actual results of the work activity.
This is the extent to which people know how well they're doing.

• The goal is to create a job that is personally meaningful provide growth opportunities and enhance motivation for employees.

Low absenteeism
& turnover.

Stress :- [AKTU - 2021-22]

- Great worry caused by a difficult situation or something causes for this situation

Effects :-

- quality of work decreases

- health can be affected
- Productivity and the quality of output go down.
- Stress is a common issue in software project teams, and it can have a significant impact on the success of the project. Identifying and managing stress in software project teams is essential for ensuring the team's productivity and morale.
- Once stress has been identified, it is important to manage it in order to ensure the success of the project.

Strategies for minimizing stress:

1. Establish Clear Goals and Objectives
2. Set Realistic Deadlines
3. Communicate Regularly
4. Take Breaks
5. Prioritize Tasks

Qn-01 Explain Professional and ethical concerns in Software Project Management? [AKTU-2022-23]

Solⁿ

Ethical & Programming concerns:

- Ethics refer to moral obligations beyond legal responsibility.

- Three group of responsibility

- 1 Universal Responsibility
- 2 Organizational " "
- 3 Professional " "

- Organizational Ethics:

- Uniform treatment of employee
- Promoting

Social Responsibility:-

- Business have an obligation to protect the community and follow safety standards

Financial Ethics:-

- Running Clear opp^m, avoiding bribery and insider trading & treating share holders fairly

- Small Companies should Support

with mental health or substance abuse issue & provide help where possible

Professional ethics:

- Professionals have duty to warn people about risk - related to their expertise
- many professions have established code of conduct that serve as guidelines for ethical behaviour among their members
- Promote trust & confidence among clients, customers & the public

Working teams:-

- Working in a group is a common practice in a software development, but not everyone enjoys it
- Organizations have various departments reflecting their structure → task group can be formed based on specific task.

There are many ways to organize

the project team. Some important ways are follows:-

- Hierarchical team organization
- matrix team organization
- Democratic team organization

The stages a team generally goes through are:-

- Forming
- Storming
- Norming
- Performing
- Adjourning

As a Project manager, a good

1. Forming:- Team is formed, members introduced each other
2. Storming:- Conflict & differences may arise, everyone has different opinion
3. Norming:- Team starts to establish some guidelines & rules
 - members begin to understand each other better way
 - like storm passed

4 Performing:- When a team is functioning as its best

- Everyone work together to achieve great result

5 Adjourning: Team task comes to end

- member reflect on their achievement & say goodbye.

Decision-making

- Decision-making in Project management is the process of making important decision that affect the outcome of a Project
- The decision-making process can be complex, depending on the type of Project and the nature of the decisions that need to be made.

Factor Consider include the Project:

- Timeline
- budget
- resources
- risk

- Project managers need to be able to make difficult decision quickly and confidently.

Organizational Structures:

- Organizational structure refers to the way a company or organization is set up.
- It is usually defined using a hierarchy chart that shows how groups or function report within the organization.
- Organizational behaviour is the study of both group and individual performance and activity within an organization.

Levels :-

1. Individual Level Analysis :-

- Includes individual level analysis such as characteristic and behaviours of employee and personalities, attitudes.

2. Group Level Analysis :-

- Include group dynamics, decisions, power, organizational politics, leadership, communication etc.

3. Organization system level analysis :
- Include how people structure their working relationship as well as how organizations interact with their external environment factors.

Dispersed and Virtual teams :

- A Virtual team is a group of people who participate in common projects by making collaborative efforts to achieve shared goals and objectives.
- These people perform tasks and jobs in a virtual work environment created and maintained through IT and software technologies.

Types of Virtual Teams :

1. Global Virtual team :

As a whole, these teams are located in different countries and cities all over the world. They can be employees of several companies which join their efforts and resources (incl. people, technology, money) to perform shared out-sourced project and achieve common goals.

2 Local Virtual team:

Members of a local virtual team usually belong to the same company. That company is either big or small.

- The combination of activities for assembling, building, organizing, controlling and supervising the virtual teamwork is called virtual team management.

- It is essential part of project team collaboration.

Communications genres:

- Communication is a critical factor in project management. These are instances where projects have failed because of miscommunication and communication gaps.
- It is also important that the right information is delivered to the right person.
- Project managers have the

responsibility to properly channelize the communication process, so that the right persons receive the right information

- Project manager must make a note of it that the information sent must be clear, concise and informative

Communication Plans:

- A Project management communication plan identifies how important information will be communicated to stakeholders throughout the project
- It also determines who will be receiving the communication, how those people will receive it, when they'll receive it, and how often they should expect to receive that information

Steps For Successful Communication Plans:

1. Define the Purpose and Approach
2. List Goals and Objectives
3. Research and Assign Roles
4. Determine Methods
5. Pinpoint High level Communication

Qw-01 Discuss role of leadership in Project management?

[AKTU - 2022-23]

Solⁿ • Project leadership, most simply is the act of leading a team towards the successful completion of a project.
